The Commission members met along the eastern portion of Sharon Drive. The meeting was called to order at 5:30. The WEO first showed the Commission members the four catch basins with completely filled silt sacks. Then the WEO brought the Commission members westerly along the road to a point where erosion formed a swale along side the road. The Commission walked down along side the road observing the erosion and the haybales and pipes placed in its path. The WEO then showed the members the various pipes meant to carry stormwater under roads. The Commission members then observed the point at which the pipe from the detention basin discharged into the wetlands. The Commission members proceeded to the location of the excavated foundation for 2 Sharon Drive, noted the lack of buffering and general damage to the site. The Commission members then returned to Sharon Drive.
