Hi Amanda,

Wendy emailed the soil data for the subject property to you October 13, 2021 explaining the results of the soil testing. If you have any additional questions, you can contact Wendy directly at warnold@llhd.org or at 860-910-0446.

Best regards,

Patti Myers

Hi Amanda,

Patti emailed me that you needed some information on the soil testing that we conducted on September 14, 2021. My soil logs are attached. Of the 10 holes that we logged, 5 had conditions considered to be "suitable for septic systems"; and 5 of the holes had conditions considered to be "potentially suitable" – this is because ledge was found at less than 4ft below existing grade. Areas with at least 2ft of naturally occurring soil over ledge can potentially be made "suitable" by site preparation per an approved plan from a professional engineer.

Please let me know if you need more information.

Best,

Wendy
